

Database Associations

Task

Create the following models in the magic_associations project

- Users
- Locations
- Tags

Task cont.

The models should be related as follows:

- A user has a location
- A location can have many users
- A location can have many tags
- A tag can have many locations

Task cont.

The following code should work:

```
User.first.location
```

```
Location.first.users
```

```
Location.first.tags
```

```
Tag.first.locations
```

Things to Know

- Rails associations
- Connection syntax
