

Hello World!

Task

Update the Index action to pass a string to the view.

Update the index template to display the string passed in from the controller.

Things to Know

- Controller class variables are passed to the view
- `app/views/hello_world/index.html.erb`

Need

A Rails Project

A test to see if the controller exists

A test to see if the index.html.erb exists

A test to see if the @var is populated in the controller

A test to see if the 'Hello world' exists in the view

Observe for @var in view?
