

# Create User Form

# Task

Using the crud\_views project update the `app/views/users/create.html.erb` to contain a form built using the form helper.

This form should capture the following attributes:

- First Name
- Last Name
- Age
- Profile

The form should submit to the create action.

# Forms

- `form_for(thing, :url => {...}) do |f|`
- `f.text_field`
- `f.text_area`
- `f.submit`

# Forms

```
<%= form_for(Organization.new, :url => { :action => :create }) do |f|
%>
  <div><%= f.text_field :name %></div>
  <div><%= f.text_area :description %></div>
  <%= f.submit %>
<% end %>
```
