Generate a Controller

Task

Generate a controller called hello_world with an index action.

Activate the server and navigate to it

http://localhost:3000/hello_world/index

Things to Know

- rails generate controller --help

rails generate controller

```
sauron:hello_class abugosh$ rails generate controller foobar index
/usr/local/Cellar/gems/1.8/gems/rack-1.3.4/lib/rack/backports/uri/c
      create  app/controllers/foobar_controller.rb
       route  get "foobar/index"
      invoke  erb
      create    app/views/foobar
      create    app/views/foobar/index.html.erb
      invoke  test_unit
      create    test/functional/foobar_controller_test.rb
      invoke  helper
      create    app/helpers/foobar_helper.rb
      invoke    test_unit
      create      test/unit/helpers/foobar_helper_test.rb
      invoke  assets
      invoke    coffee
      create      app/assets/javascripts/foobar.js.coffee
      invoke    scss
      create      app/assets/stylesheets/foobar.css.scss
sauron:hello_class abugosh$
```
